Toronto, ON, M2J0B3 || 437.879.9359 || bardiafardar@gmail.com || GitHub || LinkedIn || Portfolio

SUMMARY OF HIGHLIGHTS:

- Certified Scrum Master (CSM) with 5+ years of leading Agile transformations that cut time-to-market by 25%, boosted feature adoption by 30%, and generated over $250K incremental annual revenue through user-centric roadmaps.
- Expert at facilitating Scrum/Kanban ceremonies, integrating UX feedback loops and analytics to accelerate feature adoption and improve customer satisfaction.
- Led a cross-functional team of 38 engineers and 12 UX designers to deliver a critical product update 2 weeks ahead of schedule, improving customer satisfaction scores by 12%.

SKILLS:

- Agile Frameworks: Scrum, Kanban, SAFe, PI Planning, user story & journey mapping
- UX Collaboration: Figma wireframing, usability testing, customer interviews
- Analytics & Reporting: Jira dashboards, Mixpanel, Google Analytics, burn-down/up, cycle-time
- Tools & Communication: ClickUp, Notion, Confluence, MS Teams

PROFESSIONAL WORK EXPERIENCE:

IT Project Manager (PT), Seneca Polytechnic Hackathon — Oct 2026 – Ongoing
North York, ON, CA (Hybrid)

- Acted as the central point of coordination for a cross-functional team, ensuring all members stayed updated on goals, deliverables, and blockers.
- Encouraged continuous improvement by fostering open communication, rapid iteration, and real-time feedback loops during the event.
- Collaborated with developers and designers to translate new ideas into actionable sprint tasks, maintaining clear progress visibility in Jira and Outlook.
- Presented team updates and progress summaries to mentors and judges, helping secure recognition for creativity and teamwork.

Scrum Master (Co-op), *Vosyn AI* — Mar 2025 – Oct 2026
Etobicoke, ON, CA (Remote)

- Ran 2-week sprints for AI SaaS; stabilized velocity at 85 and cut cycle time 8→5 days (-37.5%) by enforcing WIP limits and aging-WIP reviews.
- Built Jira adoption and usage dashboards; +30% key-feature adoption informed backlog order and release scope.
- Track sprint health via burndowns and cycle-time metrics → cutting average cycle time from 8 to 5 days and keeping defect escape below 5%.
- Mentor 10+ engineers on data-driven estimation (PERT, T-shirt sizing) and embedding customer impact criteria, boosting first-review acceptance by 35%.

Co-Founder & Lead Project Manager, *Mizegerd Digital agency* Jan 2019 – Mar 2025
Tehran, Iran (Hybrid)

- Managed 110+ Agile sprints for web/mobile products, leading user story mapping workshops to align feature sets with real customer pain points.
- Instituted DoR/DoD with UX criteria; sprint carryover 30%→10%, stronger UI quality at release.
- Created data-driven project charters and milestone roadmaps, monitoring post-launch adoption metrics for distributed teams across three time zones.
- Facilitated SAFe PI planning with 50+ stakeholders, prioritizing backlog items by ROI and user feedback, accelerating time-to-market by 25%.
- Monitored team health metrics (engagement up to 4.5/5; sprint predictability 90%), driving a 15% lift in overall customer satisfaction.

Scrum Master, *Accuparan Inc.*
Peterborough, ON, CA

- Directed release of secure calibration modules with UX-informed UI tweaks, enabling 20% faster data acquisition and achieving 99.9% uptime.
- Built automated analytics pipelines to surface lab-usage patterns; used insights to refine disaster recovery protocols, cutting response time by 40%.
- Coordinated cross-discipline testing and patch management, embedding user feedback into staging sign-off to eliminate usability regressions.
- Applied sprint metrics to optimize planning across data science, embedded systems, and frontend teams, boosting throughput by 31% and velocity from 45 to 58 story points.
- Championed Agile ceremonies focused on product impact, ensuring each sprint delivered measurable value to lab users and stakeholders.
